

Company Profile

Taucap Private Limited

About Us Who We Are

NexusTech is a forward-thinking AI and automation solutions company dedicated to transforming the way industries operate. We partner with businesses across diverse sectors to deliver intelligent, scalable, and future-ready digital solutions – eliminating inefficiencies, accelerating decisions, and unlocking new growth opportunities through the power of artificial intelligence.

Our Services

Healthcare & Hospitals

- AI-powered patient data management and EHR automation
- Appointment scheduling & smart queue management systems
- Medical report summarization using NLP
- Predictive analytics for patient readmission and risk assessment
- AI chatbots for patient support and symptom pre-screening
- Automated billing, insurance claim processing & compliance reporting

Real Estate

- AI-driven property valuation and market trend analysis
- Automated lead generation and CRM integration for agents
- Smart document processing (contracts, agreements, KYC)
- Virtual AI leasing assistants and chatbots
- Predictive analytics for investment decisions
- Automated tenant onboarding and rent management workflows

Chemical & Manufacturing

- AI-based quality control and defect detection (vision AI)
- Supply chain forecasting and demand planning automation
- Regulatory compliance document automation (SDS, MSDS sheets)
- Predictive maintenance alerts via IoT data analysis
- Inventory optimization using machine learning
- AI-assisted R&D data analysis and reporting

Banking, Finance & Insurance

- Automated KYC/AML verification workflows
- AI fraud detection and real-time transaction monitoring
- Intelligent loan processing and credit scoring
- Claims automation and smart underwriting
- Financial report generation and data reconciliation
- Customer service chatbots and virtual financial advisors

Our Services

Retail & E-Commerce

- AI-powered personalized product recommendation engines
- Inventory forecasting and automated reordering
- Customer sentiment analysis from reviews & social media
- Chatbot-driven customer support automation
- Dynamic pricing engine using market intelligence
- Order processing and logistics workflow automation

Education

- AI tutoring and personalized learning path systems
- Automated student performance tracking and reporting
- Admission and enrollment process automation
- Smart content generation for e-learning platforms
- Administrative workflow automation (attendance, grading, scheduling)

Hospitality & Travel

- AI-based booking management and dynamic pricing
- Guest experience chatbots (multilingual support)
- Automated review management and sentiment tracking
- Staff scheduling and operational workflow automation
- Revenue management using predictive analytics

Legal & Compliance

- AI-powered contract review and risk flagging
- Legal document drafting assistance and automation
- Compliance monitoring and regulatory change alerts
- Case research automation using NLP
- Automated deadline and matter management workflows

Our Services

Agriculture

- AI crop yield prediction and soil analysis from data inputs
- Automated farm management and reporting dashboards
- Supply chain automation from farm to market
- Weather data integration for smart decision-making
- Pest and disease prediction using AI models

Logistics & Supply Chain

- End-to-end shipment tracking automation
- AI route optimization and delivery planning
- Warehouse management system automation
- Vendor performance analytics and procurement automation
- Demand forecasting and inventory intelligence

Hospitality & Travel

- AI-based booking management and dynamic pricing
- Guest experience chatbots (multilingual support)
- Automated review management and sentiment tracking
- Staff scheduling and operational workflow automation
- Revenue management using predictive analytics

Legal & Compliance

- AI-powered contract review and risk flagging
- Legal document drafting assistance and automation
- Compliance monitoring and regulatory change alerts
- Case research automation using NLP
- Automated deadline and matter management workflows

Why Choose

NexusTech delivers end-to-end AI and automation solutions — entirely software-based, cloud-first, and built to integrate with your existing systems. We operate across three core pillars:

Intelligent Process Automation

Replacing repetitive, manual workflows with smart, self-running systems using RPA, AI agents, and workflow orchestration tools.

AI-Powered Decision Intelligence

Giving your business the ability to predict, analyze, and act on data in real time through machine learning, predictive analytics, and business intelligence dashboards.

Conversational & Document AI

Automating how your business communicates and processes information through chatbots, virtual agents, intelligent document processing, and NLP-powered tools.

FOUNDER'S NOTE

I've watched brilliant businesses struggle—not from lack of talent, but because their systems couldn't keep up. A hospital drowning in paperwork. A real estate team chasing leads manually. A chemical company spending weeks on compliance that AI could handle in hours. A bank losing customers to slow fraud detection. These problems quietly kill growth and drain teams. At NexusTech, we made one promise: build things that actually work. No buzzwords. No shelfware. Just intelligent automation—tailored to your industry, deployed fast, and built to scale. Every industry deserves to operate at its highest potential. Every team deserves to do work that matters. That's why we're here. That's our standard. Welcome to smarter business.

— **AYUSH JHA** (Founder & CEO, NexusTech)

WHY NEXUSTECH

Pure Software, Zero Hardware Dependency

Every solution we build is cloud-based and software-driven. No hardware procurement, no physical infrastructure headaches.

Industry- Specific Expertise

We don't offer generic AI. We understand the language, regulations, workflows, and challenges of every sector we serve.

Tool-Agnostic Philosophy

We are not locked into any single vendor. We choose the best combination of tools for your specific needs, not what earns us the highest reseller margin.

Long-Term Partnership

We stay engaged after launch. Your success is our metric, not your project signature.

Rapid Time to Value

From kickoff to working pilot in weeks, not months. We move fast without cutting corners.

Scalable by Architecture

Every solution is built to grow with your business — more users, more data, more complexity, handled seamlessly.

ROI-Driven Delivery

Every automation we deploy is tied to a measurable business outcome — hours saved, revenue increased, errors reduced, costs cut.

Enterprise- Grade Security

GDPR-aware, SOC-2 aligned, and built with data protection as a foundation, not an afterthought.
